

LIKE NOTHING YOU'VE EVER SEEN

Elegant Simplicity

Introducing Prestige™ Comfort Systems

Prestige is the world's first high-definition, full-color thermostat that redefines how a thermostat can look and what a thermostat can do. And, as part of the Prestige Comfort System, the Portable Comfort Control gives you the freedom to control your comfort from every room. There's simply nothing else like it.

The Cool Factor

Like Nothing You've Ever Seen

- **High-Definition, Full Color Display*** — visual clarity of the display is 3 times better than typical thermostats
- **Graphics** — uses a graphical user interface to display information in a way that's easy to understand
- **Simple Touchscreen Technology** — no hidden doors or complex buttons
- **User Friendly** — consumers rated it 10 times easier to use than other thermostats
- **Tri-Lingual** — adjust settings to display in English, Spanish or French
- **Temperature Control on Demand** — sense and make adjustments from anywhere in your home

*Available in HD - High Definition (color) or SD - Standard Definition (black/white)

The Brains

More Than Just A Pretty Face

Wireless Technology

Prestige Comfort Systems have Honeywell RedLINK™ technology inside - giving you endless possibilities for controlling and monitoring comfort inside your home with our lifestyle enhancements like the Portable Comfort Control and our TrueSTEAM™ Humidification System.

PRESTIGE COMFORT SYSTEMS

The Simplicity

Programs Itself

At Honeywell, we don't think it should be hard for you to be comfortable - and we don't use the term "comfortable" loosely. To us, comfort is more than just being able to have the right temperature. It's also about being comfortable with using your thermostat so that you can get the energy savings you need.

Prestige's patented, interview-based setup screens use natural language to ask questions like "What time does the first person wake up in the morning?"

to guide you through programming with no need for an owner's manual. It programs itself, so you don't have to. And if you do have a question, simply press the HELP button. The on-board user's manual gives you definitions and directions for every screen.

The Savings

Pays for itself

On average, heating and cooling costs make up 50% of your utility bill, and we all know that energy costs keep skyrocketing. Because the Prestige Comfort System automatically manages your home's temperature to maximize savings, you can cut your annual heating and cooling costs by up to 33% - or by \$200 or more each year.* That's thousands of dollars over the life of the thermostat that costs just pennies a day to own and operate.

*If used as directed. Numbers based on average annual utility costs of \$1500 with 50% going to heating and cooling costs and 33% savings if used as directed.

The Information

To Prepare for Your Day and Save More Energy

Prestige Comfort Systems come standard with an Outdoor Sensor that sends a signal to the thermostat to display outdoor temperature and humidity right on the home screen. Use the information to prepare for your day and to make decisions about when to run your heating and cooling. For instance, if it's cooler outside than it is inside, you can open up your windows to save energy rather than running your system.

The Convenience

Of Humidity Control

Prestige eliminates wall clutter by controlling both temperature AND humidity when used with either a Honeywell TrueSTEAM™ Humidifier or TrueDRY™ Dehumidifier. You'll appreciate having only one control on your wall just as much as you'll like using the sliding humidity control on the Prestige Comfort System.

The Freedom

Comfort Control That Goes Where You Go

Today, most thermostats aren't conveniently located where most of us spend our time - especially where we sleep or watch TV. It's also pretty typical for most homes to have one room or area that's too hot or too cold, but we rarely do anything about it. **Isn't it time you took control of your comfort?**

You can. Now, the elegantly simple, hand-held life enters the world of home comfort with the Portable Comfort Control - a part of the Prestige Comfort System. The Portable Comfort Control is the most convenient approach to managing comfort and energy usage within your home. Because it senses temperature wherever it goes, it gives you the freedom to make adjustments from anywhere in your home to be comfortable in the rooms where you live.

Get Comfortable

The average homeowner adjusts the thermostat more than five times per day trying to get the temperature "just right" in the room that they're in. With the Portable Comfort Control, you don't have to sacrifice comfort.

Bring it with you wherever you're uncomfortable to change the temperature in that room or area. The Portable Comfort Control is perfect for the home office, the nursery, the bonus room, and for people who aren't able to easily get up to adjust the thermostat. You'll be comfortable knowing that your rooms are the exact temperature you want them to be.

Energy Savings In The Palm Of Your Hand

The Portable Comfort Control takes energy savings to a whole new level of convenience. Because it displays both outdoor temperature and humidity, you'll be better informed for making decisions about when to run your heating and cooling system - and when to turn it off to save energy.

The Portable Comfort Control also maintains the schedule from your programmable thermostat. Easily adjust the temperature setting before bedtime to set-back for energy savings after you fall asleep — or turn the system off for easy overnight energy savings.

Toggle between zones to set the temperature in any zone from anywhere in the home

One Control For Every Zone

While most homes have multiple light switches to control the electricity in different areas, most homes only have one thermostat. Be sure to also ask your contractor about multiple temperature zones or thermostats for your home. With zoning, the Portable Comfort Control can be used to change the set temperature in any zone in the house from anywhere in the house.

For example, watch TV downstairs at night, but warm the upstairs bedroom before going to bed. Or make sure that all zones are turned down for energy savings before you turn the lights out each night. You can even name each of your zones on the Portable Comfort Control by having your contractor customize it with more than 60 different naming options - upstairs, master bedroom, office - even wine cellar and home theater!
